Profile

A third-year BCA student with a strong foundation in software development, database management, and communication. Experienced in developing a Student Result Management System using Java and SQL, demonstrating strong problem-solving and attention to detail. Eager to apply technical knowledge, documentation ability, and teamwork skills in a Support Intern role to enhance the candidate experience and operational efficiency.

Projects

Student Result Management System
Technologies: Java, MySQL, JavaFX

- Developed a desktop-based result management system to automate student record handling.

- Implemented database connectivity using JDBC for secure and efficient data management.

- Designed an intuitive JavaFX interface for teachers and administrators.

- Focused on accuracy, performance, and scalability.
